### Climate Change - Do you see it?

The video above is a short introduction to climate change and how it is impacting Inuit communities. It is also a call to action by a well-know Inuit activist by the name of Sheila Watt-Cloutier, whose inspiring life story is captured in the book *The Right to Be Cold*. Mrs. Watt-Cloutier has spoken worldwide on the impact that global climate change is having on the Arctic, and is seeking to bring attention to the economic and community impacts that the actions of the rest of world are having on Nunavut and other Arctic regions.
