

At this point in the course, you should be familiar with the evidence for climate change that you can collect in your community - by yourself and with the help of others. You should be comfortable writing conversation or interview questions, and you should have conducted a first test interview, to practice with a camera and in an interview setting.

Now let's move to learning about the seven principles developed to visualizing climate change in digital media to help shape and share the story of climate change in Nunavut.
