

August at the Arctic Data Center

Summer is in full swing, and hints of fall are starting to slowly show as we creep towards the end of August. The Arctic feels summer a little differently. Days turn from being long to short in a matter of weeks, and here at the Arctic Data Center, we are starting to ramp up for a busy fall and winter full of meetings and workshops.

We have a couple new resources to share, and are excited to announce that we are hiring research software developers to join us at the National Center for Ecological Analysis and Synthesis. Please share and distribute widely, and we hope you have a wonderful rest of your summer.

NOW HIRING Research Software Developers

Apply by August 15th

Are you passionate about designing and building tools for open science? Do you want to promote reproducible, high-impact research on the earth and the environment? Do you love to collaborate at the intersection of software, science, engineering, and design? Then come join the vibrant community at NCEAS working on these issues.

Learn more and apply now!

Permafrost Discovery Gateway Monthly Seminar

Establishing a database for volcanic eruptions and landslides using ArcticDEM

Join us this month for the Permafrost Discovery Gateway monthly seminar. Dr. Chunli Dai is a

research scientist and focuses on remote sensing, satellite geodesy, gravimetry, and seismology.

More info and the zoom link here!

NEW Resource: Indigenous Data Sovereignty and Open Data in Environmental Sciences

This is an evolving reading list from Phoebe Racine (UCSB) in collaboration with NCEAS and the Arctic Data Center, geared towards understanding the ethical concerns and best practices of data collection, management, and analysis, especially as it pertains to working with Indigenous peoples and environmental science and management.

NEW Resource Page: IRB Resources

A product from an Arctic Data Center Data Fellow

The Arctic Data Center accepts data from all disciplines and research types, including research that involves human participants. To better support Arctic social science and interdisciplinary researchers, we have curated a list of resources to help guide the application process for approval from the Institutional Review Board.

Thank you for much taking the time to read our updates. If you were forwarded this newsletter and would like to subscribe to receive future updates, please email me.

Cheers and happy August,
Natasha Haycock-Chavez Community Engagement and Outreach Coordinator
