

Arctic Data Center Course Registration Now Live

We are pleased to announce three upcoming Arctic data science courses. Each year, our curation and outreach teams provide hands-on workshops held in Santa Barbara, CA and virtually, and we are pleased to announce the dates for the upcoming data training sessions in 2024. Travel support is available for in-person participation.

Learn more and apply now!

Fundamentals in Data Management for Qualitative and Quantitative Arctic Research

January 22nd - 26th, 2024 (Santa Barbara, CA)

This in-person workshop will provide researchers with an overview of reproducible and ethical research practices, steps and methods for more easily documenting and preserving their data at the Arctic Data Center, and an introduction to programming in R, paying particular attention to qualitative data management. **Learn more and apply by September 29th,**

2023 [here](#).

Reproducible Practices for Arctic Research Using R

February 26th - March 1st, 2024 (remote)

This remote workshop will provide an overview of best data management practices, data science tools for cleaning and analyzing data, and concrete steps and methods for more easily documenting and preserving

their data at the Arctic Data Center. *Following the closure of the application window for the Fundamentals in Data Management for Qualitative and Quantitative Arctic Research course, applications for this training will be promptly released. Stay tuned for further updates!*

Scalable and Computationally Reproducible Approaches to Arctic Research

March 25th - 29th, 2024 (Santa Barbara, CA)

This in-person workshop will provide researchers with an introduction to advanced topics in computationally reproducible research in python and R, including software and techniques for working with very large datasets. *Following the closure of the application window for the Reproducible Practices for Arctic Research Using R course, applications for this training will be promptly released. Stay tuned for further updates!*

Applications for our data science courses will be released consecutively, with each course having its own designated application period. **The first application window will open on August 16, 2023, and subsequent courses will follow with their respective application dates.** We encourage you to apply to your preferred courses during their respective application periods. Should you have any inquiries, please feel free to contact us. We are excited to welcome you to our data science community in the upcoming year!
